**The spirit of your city**

**ALSTOM**

## The CITADIS™ Family

With its CITADIS™ family, ALSTOM provides attractive designs for a comprehensive generation of flexible, cost-effective light rail vehicles.

CITADIS™ offers a wide choice of interior arrangement and exterior design, vehicle length and width, number of cars, floor height for example. It can thus embody the spirit of each city with style and elegance and can be harmoniously adapted to its environment through easy upgradability.

Large windows and doors, together with interiors which are free of any obstructing technical equipment, create a unique transparency and ease of access.

CITADIS™ is the result of ALSTOM's far-reaching experience in urban transport solutions; over the last ten years, ALSTOM has delivered more than 500 tramways, covering thousands of kilometres every day in major European cities. Montpellier, Lyons, Dublin and Gdansk are among the first to have chosen CITADIS™.
